I did re-rank the four pits we discussed and didn't have any that were lower than the original cleanup levels for TPH. The four were:

Tribal 14-1 - there two concentrations listed in original report 4000 and 2500 ppm. I re-scored and came up with 4000 as the value.

The 41x-2 - I re-scored and came up with 2500 ppm, which was the same as the original cleanup concentration.

44-10 - I came up with 8500 ppm, original was 5500 ppm so we will keep original concentration.

24-14 - I came up with 8500 ppm, original was 4000 so keep the original concentration.

On the last two where I came up with a higher concentration I can't say why my score was higher. I don't have the original sheet to review the various components of the calculation. The 44-10 is up on Indian Ridge without any irrigated crops and based on SEO data no shallow groundwater. 24-14 is on the south end of the main field area and is not in irrigated ground, but may have shallower groundwater. Without seeing the original scores it is hard to tell why there was a difference but we will keep the lower concentration to be more conservative.

Tom,

Thanks for the update. Originally John Corra was trying to set up a meeting for June 27, and then he said that wouldn't work and something would be set for July, but I had not heard of the new July 24 date.

Then new date is really not the best for my schedule, but I guess I'll see if I can figure something out.

Thanks for the heads up.

On another note, did you ever re-rank the pits that we discussed at the last meeting?

I have not heard that the public meeting was changed so as far as I know it is still on July 24. That is based on a conf. call on June 28 between Mr. King, Mr. Corra, Mr. Oberley, myself, and someone else from EPA (can't remember who?). It is to be held at 1:00 pm July 24 in the Commission's Hearing Room in Casper.

Will have to wait to hear from Rob, but based on Kirsten's schedule we may have to try to hold our call the afternoon of the 6th.

Or I could actually probably do something late afternoon on July 10th if that would work for everyone. I could probably step out of the Commission Hearings anytime after 2:00 if that date would be better. There really won't be need for anything but a phone, we will be mainly clarifying agency authority over cleanup work and what each agency's cleanup standards are.

Thanks,

I am available July 5, 6, 11, and 12.

Tom - Is the working group meeting definitely going to be on July 24? I had not heard this new data and will have to do some schedule rearranging to attend.

thanks - Kathy

Unfortunately I'm really not available any of those days. I am on vacation the 5th and 6th and in training the 11-13th. I could conceivably do something the afternoon of the 6th but won't have a computer so as long as I don't need to reference any documents I should be OK. I'll have my blackberry.

Subject: Pavillion Pit Workgroup Call

Hi Everyone,

I guess our next scheduled Pavillion workgroup public meeting will be taking place in Casper on July 24. I was informed that prior to that public meeting the pit workgroup should hold a call to address concerns from EPA that the WOGCC pit closure requirements may be less strict than WDEQ's requirements.

So, there are only a few days prior to that July 24 meeting that I am available. I am out of the office the week of July 16 and have Commission hearings on July 9-10. So I am available on July 5, 6, 11(morning), 12, or 13. Please respond at let me know if any of the dates I stated are good or bad for each of you and I will get a call set up and provide call in information at that time.

I think the well integrity workgroup will be having a call as well but I don't have any specific information - can't remember if anyone is in both groups?

Thanks,
